Type A  
**A**

3 mm, low noise, shielded coaxial cable is lightweight and very flexible. The 3 mm cable is frequently chosen for benchtop installations where space is at a premium and cables are required to make many sharp turns and twists.

Type M  
**M**

5 mm, low noise, shielded coaxial cable is thicker and more rugged. The 5 mm cable is often specified for pilot and process installations.

Type N  
**N**

5 mm, low noise, shielded coaxial cable is jacketed with an extra lead for connecting solution ground to differential input style transmitters.

Type B  
**B**

6 mm, low noise, shielded multi-conductor cable is jacketed with an extra lead for connecting solution ground to differential input style transmitters.
